The IBD/FBD specialized register is updated and published on the IBD/FBD Review Group website on a regular basis. This database contains MEDLINE records and is published in the Cochrane Central Register of Controlled Trials in the Cochrane Library. The trials are listed by "Author". There are currently 3,054 RCTs and CCTs in this database which would make printing this reference list inadvisable. If you find any trials that you would like further information about please e-mail me at jmacdon1@uwo.ca

SEARCH: You can search this page by using the search capabilities of your PDF Reader (Ctrl + F). You are limited to searching for one key word at a time, for example, "cyclosporine" or "crohn's" - or you could use the author's name. Continue to click "find next" until you get the message "No more matches were found".
