The IBD/FBD specialized register is updated and published on the IBD/FBD Review Group website on a regular basis. This database contains non Medline records from sources such as Digestive Disease Week and other gastroenterology meetings. These records are not published in the Cochrane Library. The RCTs and CCTs are listed by "Author". There are currently 1,457 trials in this database which would make printing this reference list inadvisable. If you find any trials that you would like further information about please e-mail me at jmacdonald@robarts.ca

SEARCH: You can search this page by using the search capabilities of your PDF Reader (Ctrl + F). You are limited to searching for one key word at a time, for example, "cyclosporine" or "crohn's" - or you could use the author's name. Continue to click "find next" until you get the message "No more matches were found".

85. Behrens, C., et al., MESALAZINE (5-ASA) MICROPELLETS SHOW COMPARABLE EFFICACY AND TOLERABILITY AS MESALAZINE TABLETS IN PATIENTS WITH ULCERATIVE COLITIS. A PROSPECTIVE,
MULTI-NATIONAL, RANDOMISED, DOUBLE-BLIND, ACTIVE-CONTROLLED CLINICAL PHASE II STUDY.

323. Eliakim, R., et al., Clinical Trial On the Efficacy and Tolerability of a Novel Low-Volume mesalamine Foam (2x1g 5-ASA/30ml) Vs mesalamine Foam (2x1g 5-ASA/ 60ml) in Active Ulcerative Proctitis Or Proctosigmoiditis. Gastroenterology, 2006. 130(4 Suppl 2): p. A-481.
